

# Simplify Your Sanitation Planning with AX3000

## Discover the Power of Efficient Sanitation System Design

The AX3000 Sanitation module developed by EDV-Software, Austria is your ultimate one-stop solution for comprehensive sanitary planning. This advanced software streamlines the design process, integrating seamlessly with other construction software modules to save you valuable time and reduce the risk of errors.

With the innovative Easyline single-line dimensioning and intelligent drawing elements, you can create detailed plans quickly and effortlessly. The AX3000 module's workflow, refined over the years, ensures efficiency by incorporating all essential standards and automatically adjusting your designs.

REQUIRES  
BricsCAD  
BIM

**BricsCAD for  
MEP Engineering**

## KEY FEATURES

### Convenient Drawing and Visualization

- Easyline single-line design
- Smart drawing elements (2D/3D pipe design)
- Extendable catalogue of 3D sanitary objects
- Automatic or manual labeling for clear communication

### Error-Free, Time-Saving Workflow

- Simultaneous design of hot and cold water systems
- Automatic connection of sanitary objects
- Wastewater system design in compliance with EN 12056/DIN 1986-100
- Drinking water calculation according to DIN 1988-300:2012-05
- Management of drinking water circulation with DVGW standards

### Comprehensive Room Book Log

- Automatic generation of room book logs for heating and sanitation systems
- Recording of room numbers and names
- 3D room height variations
- Automatic increment of room numbers for easy tracking

Let AX3000 simplify your sanitation planning process. Embrace efficiency, precision, and reliability in your next project.
